

Film wrapping machine Type FWAL-150

Easy and safe feeding of products

Film wrapping of small meat cuts

For the film wrapping of small products e.g. pork tenderloin, loin ribs or pork spareribs, Frontmatec has designed the FWAL-150.

Function

The product infeed is easily performed by dropping the product into the feed gate. Through this, the product is wrapped in plastic film, which is closely sealed directly after each product. When passing the sealing bar, the supply of film stops, and the film is sealed and automatically cut off and a new product can immediately be wrapped. Hereafter the product is automatically transported out of the machine onto the conveyor belt.

The film wrapping machine is now available with an improved security system, with optical security devices for optimal operator protection.

Advantages

By using the Frontmatec Film Wrapping Machine type FWAL-150 for the film wrapping of products before entering freezing, you ensure that the products do not stick to each other, and they are easily separated. The machine offers easy cleaning, and high accuracy of the wrapping of your products.

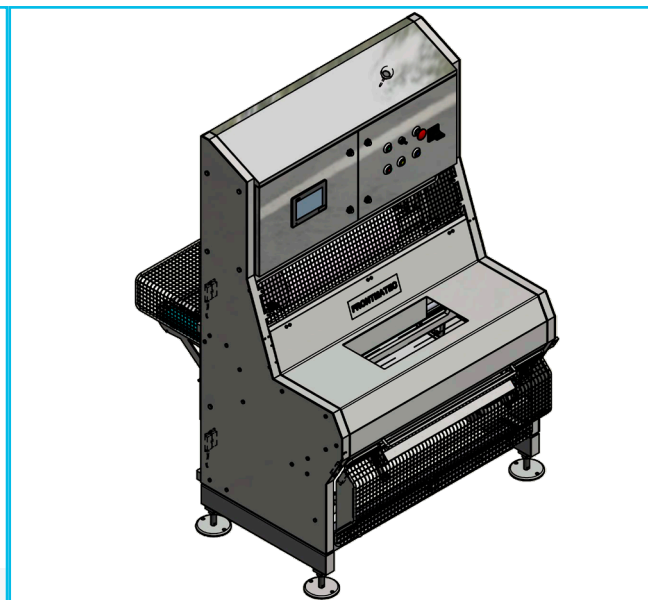

Why the Frontmatec Film Wrapping!

- Easy product infeed by dropping into feed gate
- PLC control for individual recipes
- Optional side welding unit available
- Complete stainless-steel body
- Smooth surfaces making it easy to clean

Easy access for film changing and cleaning

New safety guardings

Technical data

Capacity	20-25 products/min. depending on products*
Product dimensions	Max. 1 kg
Max. height	75 mm
Max. width	240 mm
Max. length	490 mm - depending on weight and shape of the product
Machine height	1,990 mm
Width	1,270 mm
Depth	1,400 mm
Type of film	Heat sealable PE
Film thickness	25-50 micron
Width of film roller	350-550 mm
Max. diameter of film roller	ø250 mm
Electric	Siemens PLC control with display in stainless cabinet
Voltage	3x400V, 50 Hz
Power	IN 5 Amp
Pre-fuse	16A
Air consumption	130 NL/min.
Air supply	7 bar

Technical data may be subject to changes. The equipment is CE approved and designed in accordance with the EU regulations to meet the strictest demand on health and safety.

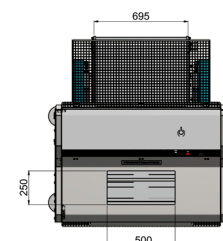

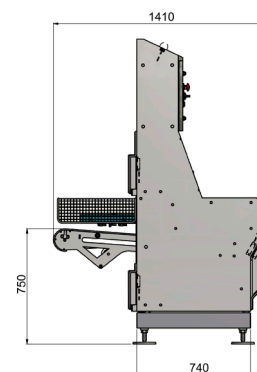

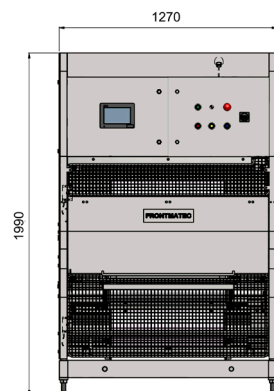

* Pork tender loin
25 products/min.
1,500 products/h

* Loin ribs
23-25 products/min.
1,500 products/h

* Pork spareribs
18-20 products/min.
1,200 products/h
