

BOX HANDLING SOLUTIONS // PACKAGING

THE BEST SOLUTION TO INCREASE PRODUCTION

Investing in a Frontmatec Asuan automatic packing solution will yield a production increase between 10-30%. Designed with the highest quality products and output in mind, we work together with you to determine the best solutions for your plant.

When working together with our accessories, such as conveyor systems, chutes, weighing options and much more, it allows you to optimize your line to its full potential. With over 50 plants automated and over 300,000 boxes per day, we are experts in the automation processes of labeling, label application, dynamic weighing and traceability.

Master high end belt and roller technologies for high rates cases handling.

Value for you!

- Increase cut floor production
- Significant decrease in labor
- Productivity impact and minimal labor dependence
- Increase Quality assurance : Avoid SKU mistakes, assure labeling quality and weigh control
- Labor accountability. The system monitors and trace each packing operator
- Traceability up to primary packing
